

READY B E F O R E THE FLOOD

improving flood and emergency preparedness through technology

the problem

Floods can happen quickly. Delayed warnings, poor communication, and unclear evacuation routes can put communities at greater risk.

what

- Floods can cause injuries, displacement, and property damage.
- Early warnings give people more time to prepare and evacuate.
- Flood-prone communities need accessible, reliable emergency information.

effects

Injuries

displacement

property damage

transportation disruptions

at risk

children . older adults.
PWDs. emergency responders

how it works

Monitor → Detect Risk → Send Alert → Check Route → Evacuate → Respond

common causes

heavy rainfall

rising water levels

poor drainage

delayed emergency warnings

flood safe

Flood Alerts - Sends timely warnings
Evacuation Map - Shows safe routes and centers
Weather Updates - Provides weather and water-level information
SOS Feature - Sends emergency alerts with location
Emergency Checklist - Helps families prepare
